REPORT OF FIELD SURVEY

The students (five) of B.A. 3rd semester with Economics honours conducted a survey in March, 2022 on the Socio-Economic Condition in different aspects such as livelihood sources, saving behaviour, Consumption pattern etc of rural people of the nearby villages of the college in the supervision of Dr. Nandita Goswami and Gitanjali Goswami. The students found that the average monthly income of the rural families is Rs. 34800 which varies from Rs. 16500 to Rs. 9000 with coefficient of variation of 101.6 percent, but the average monthly expenditure of the families is Rs. 17945 and it varies from Rs. 6250 to Rs. 37350 with coefficient of variation of 46.8 percent. Thus there is wide variation in income among the rural families but the difference is relatively less for expenditure. The rural families spend a major portion of their expenditure for food followed by travel, clothing, fuel (LPG and electricity), TV and mobile recharge, education, health etc. On an average, the rural families save almost 31 percent of their income and they mostly save their deposits in banks (85 percent) and post office (15 percent). The occupational structure of the rural families is shown in the following table.

Sl. no	Occupation	Percentage of families	
		As primary source	As secondary source
1	Farming	5	15
2	Government job	30	5
3	Private job	35	40
4	Business	10	5
5	Daily wage earning	20	35
6	Total	100	100

Source: Field survey

The table shows that the primary source of livelihood of 35 percent of the rural families is private sector job followed by Government job of 30 percent families. The secondary source of livelihood of 40 percent families is also private job followed by daily wage of 35 percent families.

Moreover, one student of the said semester conducted her survey on the Self- Help groups of two villages of Barbhag area. She found five SHGs in villages Moura and Sonkuriha and each of them have ten members. Of these SHGs, three of are promoted by bank, one is by block and the other is self promoted. Three (60 percent) of these SHGs are engaged in economic activities like fish keeping, weaving and agricultural farming and the other two are engaged in accumulating savings of the members and in providing loans. The average annual profit of the SHGs engaging in economic activities is Rs. 29300.

The photos of the survey are given below:

The List of the students who conducted field survey is given below:
